

# THE COLORADO TENT

*Est. 1890*

## How to Set up The Range Tent

1. First stake out the 2 front corners, this will position your door. Then stake out the back 2 corners, making sure the tent is square.
2. Stake down the remaining rope loops around the sides of the tent.
3. Assemble the pole set. Place pole set over the range tent, attaching the loop on the peak of the tent to the snap hook at the top of the pole set. Push the legs of the pole set in toward the tent so the peak is lifted and the walls are tight.
4. OPTIONAL: Attach ropes into the pull-outs, midway up the side and back walls. Stake out the back pull-out tight enough to hold the back wall out. Tie the side pull –outs to the poles. This keeps the walls from sagging and provides more room inside.

Thank you for purchasing a Colorado Tent Range Tent.
